

ASSISTIVE TECHNOLOGY

Hearing loss may interfere with daily communication on many occasions. A hearing aid may be of benefit to certain people, but some situations may still present a problem which could require additional assistive technology. It might be difficult listening in a noisy restaurant or in a business meeting where the speaker is at a distance from the listener. The telephone can present a special problem where even a hearing aid may not be of any help. Doorbells or safety alarms with flashing lights or strobe lights are other assistive devices which can be particularly helpful. There are many assistive communication devices available for persons with hearing loss and a primary resource for assistive technology information is ATNetwork. The contact information for this organization and others are listed below.

ATNETWORK

The Alliance for Technology Access (ATNetwork Affiliate)

1304 Southpoint Boulevard, Suite 240

Petaluma, CA 94954

(800) 390-2699 (Voice)

(800) 900-0706 (TTY)

Website: www.atnet.org

E-mail: info@atnet.org

This is a statewide project which promotes: access to assistive technologies, related services, technology resource centers, community based organizations and assistive technology information to enable children and adults with disabilities. This organization, founded by the Foundation for Independent Living Centers, works in conjunction with the California Department of Rehabilitation to make assistive technology accessible to people with disabilities. Their on-line service directory has a comprehensive listing of assistive technology resources. Other services provided include: information and referral, funding for assistive technology, advocacy and training.
